Subject: Microsoft Settlement

hello.

I don't like the settlement proposed between MS and DOJ.

I think it does not help consumers or companies who have been hurt.

I like what the 9 states are saying about a striped down version of windows with no frills. Windows runs much better when all the extra stuff is removed . when ever I set up my computer I remove IE with a nifty program called 98lite. it makes the computer much more stable and faster. because the IE integration is removed, as a consumer I wish not to be pushed software from MS onto my desktop. I would like to choose what I want, and have a clean OS nothing but an OS, then choose my software.

thank you for you time.
Jonas
